1) Put toggle_library.js in your AppData\Local\Mixx\Controllers folder

2)

```xml
<?xml version='1.0' encoding='utf-8'?>
<MixxxControllerPreset mixxxVersion="" schemaVersion="1">
    <info>
        <name>yourcontroller</name>
    </info>
    <controller id="">
        <scriptfiles>
                <file filename="toggle_library.js" functionprefix="MyController"/>
        </scriptfiles>
```

3)

connect the script in your mapping midi xml. Add this string

<file filename="toggle_library.js" functionprefix="MyController"/>

4) Add a new mapping control in controls

```xml
<control>
    <group>[Skin]</group>
    <key>show_library</key>
    <description>Toggle Library Visibility</description>
    <status>0x90</status>    <!-- midi channel 1 -->
    <midino>92</midino>    <!-- your midi note # (92)-->
    <options>
        <script-binding/>
    </options>
</control>
```

5)

<control>

   <group>[Skin]</group>

   <key>show_library</key>

   <description>Toggle Library Visibility</description>

   <status>0x90</status>  <!-- midi channel 1 -->

   <midino>92</midino>  <!-- your midi note number (92) for example or 0x61 in hex—you can change it>

   <options>

      <script-binding/>

   </options>

</control>
